

04_ Business Insights & Recommendations

Executive Summary

The analysis reveals strong revenue performance, high customer satisfaction, and efficient order fulfillment. However, customer retention remains low, revenue is concentrated within a small number of product categories, and delivery delays continue to impact a portion of orders. These findings highlight opportunities to improve customer lifetime value, optimize operations, and strengthen long-term business growth.

Revenue Insights

Findings

- Total revenue reached R\$16.01M.
- São Paulo generated the highest revenue contribution.
- Revenue growth remained strong throughout the reporting period.
- A limited number of product categories contributed a significant share of total revenue.

Recommendations

- Continue investing in high-performing markets such as São Paulo.
- Increase marketing efforts around top-performing product categories.
- Diversify revenue sources by promoting underperforming categories with growth potential.

Customer Insights

Findings

- The business served approximately 96K unique customers.
- Customer acquisition increased significantly during 2018.
- Repeat purchase rate remained low at 3.12%.

- Most customers completed only a single purchase.

Recommendations

- Introduce customer loyalty and rewards programs.
- Implement personalized email and remarketing campaigns.
- Develop retention-focused strategies to increase repeat purchases and customer lifetime value.

Product Insights

Findings

- Health & Beauty generated the highest revenue.
- Bed Bath Table generated the highest order volume.
- Revenue is concentrated among a relatively small number of categories.

Recommendations

- Prioritize inventory availability for top-performing categories.
- Expand successful product lines within high-demand categories.
- Review underperforming categories for optimization opportunities.

Operational Insights

Findings

- Average delivery time was 9.33 days.
- Approximately 7.87% of orders experienced delays.
- São Paulo recorded the highest delayed order volume.
- Delivery success rate exceeded 97%.

Recommendations

- Investigate delay causes in high-volume regions.
- Improve logistics planning during peak demand periods.
- Establish delivery performance monitoring for key operational regions.

Customer Satisfaction Insights

Findings

- Average review score remained above 4.0.
- Approximately 58% of reviews were five-star ratings.
- Customer sentiment remained largely positive.

Recommendations

- Maintain service quality standards that support strong customer satisfaction.
- Analyze low-rated reviews to identify recurring service issues.
- Use customer feedback to continuously improve fulfillment and support processes.

Strategic Recommendations

1. Increase customer retention through loyalty and personalized engagement programs.
2. Strengthen logistics performance in regions experiencing higher delivery delays.
3. Expand investment in top-performing product categories while developing growth strategies for underperforming segments.
4. Continue monitoring customer satisfaction metrics to preserve strong brand perception.
5. Use data-driven decision-making to optimize marketing, inventory, and operational planning across the business.
