## Q1. What Is the Total Revenue Generated by the Marketplace?

Result: 16,008,872.12

Insight: The marketplace generated total revenue of 16.01 million during the analysis period, demonstrating substantial transaction volume and a strong foundation for revenue growth and profitability analysis.

## Q2. What Is the Average Order Value (AOV)?

Result: 160.99

Insight: Customers spent an average of 160.99 per order. This metric serves as a key indicator of customer purchasing behavior and overall marketplace transaction value.

## Q3. How Is Revenue Distributed Across Payment Methods?

Result:

Credit Card : 12,542,084.19

Boleto : 2,869,361.27

Voucher : 379,436.87

Debit Card : 217,989.79

Insight: Credit cards dominate marketplace transactions, contributing the vast majority of total revenue. Alternative payment methods such as boleto, vouchers, and debit cards account for a significantly smaller share of revenue, indicating strong customer preference for credit-based purchases.

## Q4. Which Payment Method Is Used Most Frequently?

Result:

Credit Card : 76,795

Boleto : 19,784

Voucher : 5,775

Debit Card : 1,529

Insight: Credit cards are the preferred payment method among customers, accounting for the majority of transactions. Boleto serves as the secondary payment option, while voucher and debit card usage remain comparatively low.

## **Q5. What Is the Average Number of Installments per Payment?**

Result: 2.85 installments

Insight: Customers paid for their purchases using an average of 2.85 installments, indicating a strong preference for spreading payments over time rather than making full upfront payments.

## **Q6. What Percentage of Payments Were Made Using Installments?**

Result: 49.42%

Insight: Nearly half of all marketplace payments were made using installment plans. This indicates that flexible payment options play a significant role in customer purchasing decisions and contribute to marketplace accessibility.

## **Q7. Which Payment Method Generates the Highest Share of Revenue?**

Result: 78.34%

Insight: Credit card payments account for 78.34% of total marketplace revenue, making them the dominant revenue driver. This highlights a strong customer preference for credit-based purchasing and indicates significant business dependence on credit card transactions.

## **Q8. What Is the Distribution of Installment Usage?**

Result:

1 Installment : 52,546 payments

2 Installments : 12,413 payments

3 Installments : 10,461 payments

4 Installments : 7,098 payments

5 Installments : 5,239 payments

10 Installments : 5,328 payments

Insight: Single-payment transactions are the most common payment behavior. However, installment-based purchases are also widely adopted, with 2, 3, and 4-installment plans being particularly popular. The strong usage of 10-installment plans further highlights customer preference for flexible payment options.

## **Q9. What Are the Highest Value Orders?**

Result:

Highest Order Value: 13,664.08

Top 10 highest-value orders ranged from 4,681.78 to 13,664.08.

Insight: A small number of orders generated exceptionally high transaction values compared to the marketplace average order value of 160.99. These transactions represent premium purchases and highlight the presence of high-spending customers within the marketplace.

## **Q10. How Much Revenue Is Generated by the Top 10 Highest-Value Orders?**

Result: 66,804.58

Insight: The top 10 highest-value orders generated a combined revenue of 66,804.58. While these premium transactions contribute significantly to individual order value, overall marketplace revenue remains broadly distributed across thousands of customer purchases rather than being concentrated among a small number of orders.
