

02_Business Understanding

Business Overview

The company operates as an online e-commerce marketplace that connects customers with sellers across multiple product categories. Customers browse products, place orders, complete payments, receive deliveries, and provide reviews based on their experience. The business relies on customer satisfaction, operational efficiency, and repeat purchases to support long-term growth.

Business Model

- Customers purchase products through the online platform
- Sellers list and fulfill products
- Payments are processed digitally
- Orders are delivered through logistics partners
- Customers provide reviews and ratings after delivery
- Business growth depends on customer retention and operational efficiency

Customer Journey

Customer Visits Platform

- Browses Products
- Places Order
- Makes Payment
- Seller Processes Order
- Product Gets Delivered
- Customer Reviews Product/Service Experience
- Customer Returns or Churns

Revenue Flow

Revenue is generated through completed customer purchases on the platform. Business growth depends on increasing order volume, improving repeat purchases, maintaining customer satisfaction, and optimizing operational performance.

Core Business Areas

- Customer Acquisition
- Customer Retention
- Product Performance
- Payment Operations
- Delivery & Logistics
- Customer Satisfaction
- Revenue Growth
